9   Main theme stulesheet is here
10  <!-- ===== VENDOR STYLESHEET ===== -->
11  All Vensor stylesheets are here
```

```
12 <!-- ===== CUSTOM CSS ===== -->
13 <style>
14 You can write your own css code here
15 </style>
16 </head>
```

HTML Body Structure

```
1 <body>
2 <header>
3 <nav>
4 Navigation bar code is here
5 </nav>
6 Mobile navigation code is here
7 </header>
8 <main>
9 Main Code is start from here
10 <section>
11 Section Initilization
12 </section>
13 </main>
14
```

HTML Footer Structure

```
1 <footer>
2 All footer code is here
3 </footer>
4 <!-- ===== VENDOR JS ===== -->
5 All required vendor scripts is here
6 <!-- ===== THEME JS ===== -->
```

```
7     Theme scripts is here
8 </body>
```

given are basic structure for better understanding

How to Customize template style

(for this you need to install sass)

After installation just compile your code from main sass file to main.css file

NOTE: All sass files like `_header.scss`, `_section.scss` files are must included in `main.scss`.

Usage of sass files

`_HEADER-SCSS` ---- This file is for all navigation and header section css code

`_BANNER.SCSS` ---- This file is for Banner section css code

`_SECTION.SCSS` ---- This file is for all internal sections like Trailer section, Categories section, about, T&C, Privacy Policy page Internal section.

`_FOOTER.SCSS` ---- This file is for footer css code

`_BUTTONS` – This file includes all button css code

`_EXTRA` – All other extra css code is here

`_MIXIN` – all media queries are here

`_TYPOGRAPHY`– all typography like font color and size code is here

`_VIDCARDS` – All video card and slider code is here

`MAIN.SCSS` – This file includes all sass files.

How to change theme color

open root.scss file and change variable of color

```
1  $color-primary: $color-red;
2  $color-secondary:$red-secondary;
3  $color-bg: $red-bg;
4  $color-font: $red-font;
5  $color-tertiary: $red-tertiary;
6  $color-btn: $color-white;
```

By default theme colors are

1. Red
2. Blue
3. Yellow

All color variables with color code are in _base.scss file

```
1  // ==PRIMARY COLORS== //
2  $color-red:#E50914;
3  $color-yellow: #f1b815;
4  $color-blue:  #1f80e0;
5
6  // ==THEME BACKGROUND COLORS== //
7  $red-bg: #000000;
8  $yellow-bg: #141414;
9  $blue-bg: #0c111b;
10 // ==SECONDARY COLORS== //
11 $red-secondary: #111111;
12 $yellow-secondary: #242424;
13 $blue-secondary: #192133;
14 // ==TERTIARY COLORS== //
15 $red-tertiary: #303030;
```

```

16 $yellow-tertiary: #616161;
17 $blue-tertiary: #192133;
18 // == THEME FONT COLORS== //
19 $red-font: #fff;
20 $yellw-font:#becad8;
21 $blue-font:#FFDFDF;
22 // == OTHER COLORS ==//
23 $color-white:#fff;
24 $color-black: #000000;
25 $color-grey: #c1c1c1;

```

How to change theme font style and size

```

1 //===== THEME FONT =====//
2 $font-family: 'Exo 2', sans-serif;
3 $font-family2: 'DM Sans', sans-serif;
4 $font-trailer: 'Big Shoulders Stencil Text', cursive;
5 //===== FONT SIZE =====//
6 // == PLAYER HEADING == //
7 $h2-size:2.5em;
8 $h2-weight:600;
9 $h2-l-height:1.4em;
10 // == SECTION HEADING == //
11 $h3-size:2em;
12 $h3-weight:700;
13 $h3-l-height:1.4em;
14 // -- CARD HEADING ==//
15 $h5-size:19PX;
16 $h5-weight:500;

```

```
17 $h5-l-height:1.4em;
18 // == PARAGRAPH ==//
19 $p-size:16PX;
20 $p-weight:500;
21 $p-l-height:1.61em;
22 // == PARAGRAPH TWO ==//
23 $p2-size:14PX;
24 $p2-weight:300;
25 $p-l-height:1.61em;
26 // == OTHER ==//
27 $h6-size:14px;
28 $h6-weight:400;
29
30
31 // ===== FONT SIZE FOR MOBILE ===== //
32 // == SECTION HEADING == //
33 $h3-size-m:20px;
34 $h3-weight-m:500 !important;
35
36 // -- CARD HEADING ==//
37 $h5-size-m:16px;
38 // == PARAGRAPH ==//
39 $p-size-m:15px;
40
```

Using this variables you can change don't size universally

NOTE : Some font size are set in typography.scss file you can change from there

How to Customize slider

Swiper - The Most Modern Mobile Touch Slider

Swiper is the most modern free mobile touch slider with hardware accelerated transitions and amazing native behavior.
